FALL BLOOMING IRIS OR REPEAT BLOOMERS

In our part of the U. S. and in many other sections of the country these repeat bloomers are becoming quite popular. In fact, with a little extra care and attention, one can have iris bloom almost the year around. Jean Siret and Lieut de Chavagnac, both dwarfs bloom abundantly through out the year, as others will, if given good soil and adequate moisture. If there is lack of rain, a good soaking of your repeat bloomers at least one a month will surprise you with results. Be sure that you have good drainage.
